

The amended description for the Sand Hills Boulder Sales is as follows:

Operator intends to collect approximately 12,000 tons (8,000 cubic yards) of boulders from the surface over two separate five (5) acre areas delineated on the attached map under two negotiated sale contracts pursuant to 43 CFR 3600. The areas reside in the Southern Sand Hills 5 miles south of Red Rock and 2 miles east of Peterson Mountains California. The work will be accomplished with a flatbed crane truck and is anticipated to result in minimal surface disturbance that will be reclaimed contemporaneous with the boulder collection activity. This flatbed crane will not leave established roadways. The collection will occur throughout a 5-year period during the dry season.

BLM Acres for the Project Area: Less than 10 acres

Legal description for the respective sale areas is as follows

Sale Area A = sec 22 S2SWSWSE, T. 23 N., R. 18 E., MDBM

Sale Area B = sec 25 SWSWNWSW & sec. 26 SESENESE, T. 23 N., R. 18 E., MDBM
